

The Safer Way Financial Institutions Innovate, Test, and Train

Secure Environments for High-Risk Collaboration & Threat Research

Building Pressure

Financial institutions are innovating faster than their controls can keep up. AI pilots, third-party tools, and cross-border data work strain compliance limits, slowing progress and pushing sensitive activity into the shadows.

New innovations expand the attack surface.

The Breakthrough

Instead of locking down, provide the outlet for true innovation: Secure, uniquely persistent or ephemeral environments to explore, analyze, and collaborate on high-risk work

Isolate, Validate, Innovate.

PROTECTION EVERYWHERE

CYBER EXERCISES

Train teams in realistic, risk-free conditions

M&A ISOLATION

Speed tech integrations and mitigate risk

ISOLATED FORENSICS

100% containment for malware and malicious code response

VENDOR & THIRD-PARTY R&D

Vet and develop with external tools and services

FRAUD INVESTIGATION

Research active fraud and exploits with managed attribution

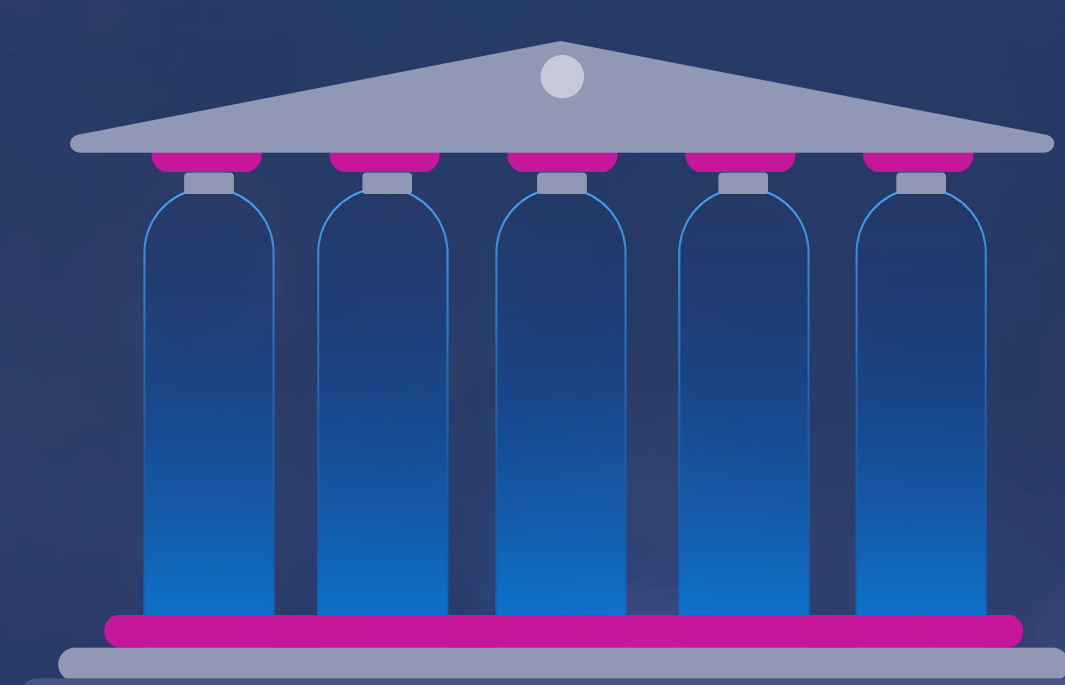

REGULATORY COMPLIANCE

Conduct risky activity while maintaining observability

RESEARCH & DEVELOPMENT

Restricted R&D with complete control over sensitive data

ACCELERATE INNOVATION

Launch, test, and iterate faster with confidence.

ASSURE COMPLIANCE

Every session logged, isolated & auditable.

DEFEND REPUTATION

Eliminate leaks, downtime, and exposure.

The future of financial security isn't about higher walls, it's knowing how to safely remove constraints. The Replica platform provides secure environments where your team can move fast, collaborate freely, and stay fully protected, from M&A and audits to fraud simulation and AI research.
